

Threaded bars and external threaded products

Threaded products for builders

We supply and manufacture external threaded parts for a variety of applications, such as concrete builders for threaded anchor formwork attachments and a variety of adhesion needs. Threaded bars are available treated according to your mounting needs in pieces according to the dimensions, bended, etc.

We are able to provide flexibility from orders for a few pieces to orders of thousands of pieces.

For special needs, we can manufacture special-dimension threaded products, as well as special threads with the threading machine.

OUR RANGE OF PRODUCTS

- standard threaded bar (also cutted and/or bended)
- threaded round bars and pipes
- threaded rebar
- thread can be rolled or machined

Standard steel qualities for threaded pins and bolts:
S355, S235, 1.4404, 1.4301 and 1.4305.

We thread also other raw materials, on request where possible.
